

AREAS FOR FURTHER DEVELOPMENT

T LEVEL: DESIGN, SURVEYING AND PLANNING FOR CONSTRUCTION

T Level learners will have covered a broad spectrum of knowledge and understanding of the concepts, theories and principles relevant to the T level in the core content. They will then specialise and cover the knowledge and skills required in that occupational specialism, putting this into practise during the industry placement. There may be some areas a learner will need to further develop in a workplace environment following a T Level to reach full competence, such as behaviours. Following engagement with employers, industry experts and providers, we have captured below what these areas for development may be following a T Level. This will depend on the learner and an initial assessment. The RPL guidance gives further details.

Occupational Specialism: Surveying and Design for Construction and the Built Environment **Standard: Surveying Technician**

Aspects for further development

Knowledge

K1 Law- in particular the law of tort
K3 Economics
K5 Sustainability

Skills

S1 Data collection and analysis
S2 Health and safety
S4 Law

Additional Learning

Further Practical Application in the workplace

Behaviours
